Airbnb Global Performance Dashboard

Professional business intelligence analysis of platform growth, market share, and competitive positioning across major cities worldwide.

Made with GAMMA

Project Overview

Business Intelligence Lens

Evaluates Airbnb's global platform performance through growth phases, market concentration, review intensity, and customer satisfaction metrics.

Strategic Objective

Identify where Airbnb is strongest, how the platform evolved over time, and what operational or market factors drive demand.

Made with GAMMA

Dataset at a Glance

279K

Listings

Total properties across platform

Dashboard 1: Growth Analysis

Interprets Airbnb's business lifecycle through introduction, growth, maturity, decline, reinvention, and COVID-19 disruption phases.

1. **2015: Peak Growth**
   New listings reached maximum expansion
2. **2016-2017: Slowdown**
   Tighter regulation reduced growth rate
3. **2020: Disruption**
   Pandemic disrupted expansion trajectory

Made with GAMMA

Dashboard 2: Market Concentration

Top Three Cities

Paris, New York, and Sydney together account for nearly half of total listings and roughly 59% of total reviews.

Paris Dominance

Paris stands out as the dominant market, supported by strong pricing advantage versus hotel rooms.

Made with GAMMA

Key Business Assumptions

Price Advantage

Higher hotel prices increase Airbnb adoption

Review Volume

Proxy for customer engagement and platform activity

Rating Influence

Influences booking demand and market preference

Market Concentration

Reflects platform maturity and brand strength

Regulatory Impact

Regulation and macro shocks affect listing growth

Made with GAMMA

Tools and Skills Applied

Power BI

Dashboard design and storytelling for business intelligence

Power Query

Data preparation and transformation workflows

DAX

KPI calculations and business metric modeling

Business Analytics

Trend interpretation and strategic insight generation

Made with GAMMA

Strategic Insights

Platform Scale

Massive inventory across 10 cities with 279,712 listings demonstrates market penetration and host network strength.

Selective Dominance

Concentration in Paris, New York, and Sydney shows strategic focus on high-value markets with regulatory stability.

Pricing Advantage

Significant gap versus hotel rooms in key markets drives customer preference and booking conversion rates.

Made with GAMMA

Performance Highlights

Review Intensity

5.3M+ reviews across platform indicates high customer engagement and transaction volume.

Host Network

182,024 hosts create supply elasticity and rapid inventory response to demand shifts.

Property Diversity

144 property types accommodate varied traveler preferences and price segments.

Market Maturity

Concentration reflects established brand presence and operational infrastructure.

Made with GAMMA

Conclusion

The dashboard demonstrates Airbnb's strongest value lies in platform scale, selective city dominance, and pricing advantage over traditional hotel options in key markets.

Portfolio Ready

Combines data visualization with business interpretation for case study presentation

Strategic Insight

Clear narrative on growth phases and market dynamics

Technical Execution

Power BI, DAX, and analytics skills showcased effectively
